Revenue

Revenue increased from EUR 1,041.4 million to EUR 1,139.4 million, an increase of 9% compared to the first nine months of 2014. Revenue in Europe was flat, Asia Pacific, Other Emerging Markets and the US contributed to the increase. The first time inclusion of acquired companies, in particular Danasia, Philippines (since September 2014), Kushalchand, India (since April 2015) and MF Cachat, United States (since 24 June 2015) had a positive contribution of approximately EUR 83 million to revenue. On a constant currency basis revenue increased with 7%.

Gross profit

Gross profit (revenue less costs of materials and inbound logistics), one of the key performance indicators, increased by 14% to EUR 249.4 million (+11% on a constant currency basis). The gross profit in % of revenue improved in all regions resulting in an overall increase to 21.9% in the first nine months of 2015 (21.1% in the first nine months of 2014). This increase was the balance of further optimisation of the product portfolio, the first time inclusion of acquired companies, local market circumstances and the usual fluctuations in the product mix.

Operating EBITA

In the first nine months of 2015 the operating EBITA amounted to EUR 96.3 million, an increase of 17% compared to the first nine months of 2014 (+14% on a constant currency basis). This growth was a combination of the first time inclusion of acquired companies and organic growth in all regions. Operating EBITA in % of revenue increased to 8.5% compared to 7.9% in the first nine months of 2014.

Cash flow and capital expenditure

Free cash flow was EUR 80.8 million compared to EUR 55.4 million in the first nine months of 2014, an increase of EUR 25.4 million. The cash generative nature of the business combined with asset light operations resulted in a cash conversion margin of 81.8% compared to 65.5% in the first nine months of 2014. The higher operating EBITDA combined with lower working capital investments was the main driver of this improvement.

The investment in working capital (sum of inventories, trade and other receivables minus trade and other payables) in the first nine months of 2015 was EUR 16.1 million compared to EUR 27.5 million in the first nine months of 2014.

Capital expenditure in the first nine months of 2015 was EUR 2.4 million compared to EUR 1.7 million in the same period of 2014.

Net debt

Net debt was EUR 421.8 million on 30 September 2015, compared to EUR 257.8 million as per 31 December 2014.

The increase in net debt is predominantly the balance of positive cash flows from operating activities and the net proceeds from the issuance of new shares of EUR 84.2 million in the second quarter of 2015, set off by cash outflows as a result of acquisition purchase prices paid and a dividend payment of EUR 10 million. Furthermore, net debt increased with approximately EUR 53 million due to the increase of deferred contingent considerations related to acquisitions made.

The reported leverage ratio at the end of September 2015, including the last full year result of MF Cachat, was 2.9 times EBITDA (2.3 times at the end of December 2014).

Calculated on the basis of the definitions used in the IMCD loan documentation, the leverage ratio at the end of September 2015 was 2.4 times EBITDA (2.2 times at the end of December 2014).

Operating EBITA	-8.4	-6.7	-1.8	-27%	-23%

Holding companies relate to all non-operating companies, including the head office in Rotterdam and the regional office in Singapore. The rise in costs is due to the growth of IMCD resulting in strengthening the support functions both in Rotterdam and Singapore, costs related to a share based long term incentive plan (LTIP) of EUR 0.5 million and additional costs as a consequence of the listing in June 2014. In the course of the third quarter of 2015, the Company purchased 100,000 IMCD shares to hedge its potential obligations arising from conditionally awarded performance shares under IMCD's LTIP.

Outlook

IMCD operates in different, often fragmented market segments in multiple geographic regions, connecting many customers and suppliers across a very diverse product range. In general, results are impacted by macroeconomic conditions and developments in specific industries. Furthermore results can be influenced from period to period by, amongst others, the ability to maintain and expand commercial relationships, the ability to introduce new products and start new customer and supplier relations and the timing, scope and impact of acquisitions.

Based on the performance in the first nine months of 2015 and the strong fundamentals of the business, excluding the contribution of the acquired companies, IMCD expects continuing EBITA growth in 2015.
